CHRISTIAN JAY B. SESE

Information Technology Graduate | Full Stack | Database Management | Software Engineering
Caloocan City, Philippines | 0970-697-8081 | sese.christianjay.bayaron@gmail.com
Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Highly adaptable Software Engineer with hands-on experience in full-stack development, AI/Machine Learning (PyTorch), and enterprise IT infrastructure. Proven ability to build automated workflows, engineer scalable applications, and optimize databases. Actively studying Japanese (Marugoto) and seeking to apply technical and problem-solving skills in a global technology company.

TECHNICAL SKILLS

Programming & Scripting: Python, Java, JavaScript, PHP, Bash, C++ (Currently learning)
Web & Frameworks: HTML5, CSS3, Full-Stack Architecture, REST APIs, Flask
Databases & Containers: MySQL, Oracle Database, Docker, SQL Query Optimization
Tools & Platforms: Git, GitHub, VS Code, Eclipse IDE, XAMPP, Replit
Workflow Automation: Microsoft Power Apps, Power Automate
Machine Learning: PyTorch, Scikit-learn, OpenCV, Linear Regression

LANGUAGES

- Japanese: Active self-study using Marugoto curriculum (Aiming for JLPT N5/N4).
- English / Filipino: Fluent

EXPERIENCE

IT Infrastructure – Network Intern | *DENSO TEN Solutions Philippines Corporation*
September 2025 – March 2026

- Provided first- and second-line technical support for enterprise users, resolving hardware, software, and TCP/IP network issues under ITIL service standards.
- Engineered an automated ticket reassignment workflow using Power Apps and Power Automate, reducing internal service desk routing delays.
- Performed remote diagnostics, system provisioning, and hardware lifecycle setups across enterprise subnets; authored SOPs, troubleshooting guides, and asset inventories.

E-Commerce & Operations Assistant | *Jem's Tokyo Minimart*
June 2023 – July 2026

- Managed end-to-end order fulfillment, inventory tracking, and logistics dispatch in a fast-paced retail environment.
- Handled CRM inquiries, social media, and live-streaming sales sessions for Japanese products to drive conversions.

PROJECTS

QCU Asset Management System with Predictive & Descriptive Analytics (Capstone)
Project Manager & Full-Stack Contributor | MySQL, Docker, Python/PHP

- Led end-to-end development, system architecture, and database integration for a campus asset tracking system.
- Implemented a linear regression–based machine learning model using historical incident and asset records to forecast asset failure risk and support preventive maintenance planning.
- Containerized application components with Docker for consistent deployment and authored software documentation, API specifications, and database schema blueprints.

Quezon City University Alumni Portal
Project Manager & Full-Stack Contributor | Oracle Database, Docker, PHP, JavaScript

- Developed custom backend endpoints and interactive frontend interfaces for profile management, batch tracking, and event logs.
- Integrated Oracle Database hosted inside Docker containers to support reliable database transaction management and environment consistency.
- Managed version control and GitHub code reviews to maintain modular code structure and documentation.

Infrastructure & Networking Home Lab
Ubuntu Server, VirtualBox, GitHub, Nginx, UFW, Fail2Ban

- Simulated enterprise infrastructure workflows by building virtualized network sandboxes.
- Configured firewall access controls and automated security rules to prevent unauthorized intrusion.
- Published operational playbooks and troubleshooting logs to GitHub.

Brain Tumor Classification & Explainability System
PyTorch, OpenCV, Scikit-learn

- Built a machine learning pipeline using PyTorch and OpenCV to classify brain MRI images into four categories (Glioma, Meningioma, Pituitary, No Tumor) using a 7,200-image open-source dataset.
- Fine-tuned ResNet50 and EfficientNetB0 via multi-stage transfer learning, achieving 98.33% baseline test accuracy; engineered a feature-level ensemble with an attention mechanism, reaching 99.17% validation accuracy and 0.999 AUC-ROC.
- Applied CLAHE for medical image enhancement and Grad-CAM heatmaps to improve model explainability for clinical decision support.

EDUCATION

QUEZON CITY UNIVERSITY | *Bachelor of Science in Information Technology*
August 2022 – June 2026
